

MicroStrategy: An Enterprise Analytics and Mobility Leader

Our goal is to provide enterprise customers with a world-class software platform and expert services, so they can realize their vision of the Intelligent Enterprise™. Top-rated by leading analysts, including Gartner and Forrester, MicroStrategy is one of the largest independent, publicly-traded analytics vendors as measured by annual revenue.

Platform

MicroStrategy 2019 is a modern enterprise analytics and mobility platform that can be deployed on-premises or on multiple private and public cloud platforms such as Amazon Web Services (AWS) and Microsoft Azure. The platform delivers a proprietary Enterprise Semantic Graph that enables a Google-like index for all enterprise data assets. It categorizes and federates your data investments in real time and fuels AI experiences through contextual, personalized recommendations and insights that users can trust.

MicroStrategy 2019 also uniquely offers:

- 200+ connectors to the most popular drivers and gateways to enterprise assets
- A comprehensive set of REST APIs that makes it easy to embed the platform in packaged and custom applications, workflows, and devices
- Tools to deploy within AWS or Microsoft Azure in minutes with a centralized Cloud Console that allows administrators to easily manage, monitor, and schedule tasks
- Comprehensive platform administration, security, and architecture, including role-based access to both row and column data
- A platform designed to scale with large datasets and deliver rapid response times
- A full suite of capabilities, including enterprise reporting, automated distribution, advanced analytics, and integrated mobile app development in a single platform
- Integrated digital identity solutions that deliver user-friendly authentication and real-time telemetry applications for location intelligence
